

# ACC-1

Arcade Crane Controller

## Description

The ACC is an upgraded/replaceable board for Greyhound, United Textile, Talon, and Treasure Chest arcade cranes. The ACC turns your old crane into high power money making machine at minimum cost. ACC-1 has statistically controlled claw power, which provides the vender with complete control of the payout rates. The board has user friendly 4x16 LCD character display which simplifies system configuration, making it fast and simple to change prices, claw power, payout rates, attraction sounds, win options, and play timer. The board also incorporates MP3 quality melody/sound systems where new tunes, melodies, and attraction sounds can be uploaded on site at no cost. The system software is completely upgradeable and new versions of the software can be downloaded from the Jernie web site. Customization of the software/hardware is available upon request
